Lecture:
Wednesday
October 16
12-1 PM
PCAC, A218

After spending a month aboard an ocean-going research vessel with UNH marine scientists, artist Lindsay Olson from Columbia College Chicago was inspired to create textile-based art that visually documents the underwater soundscape of sea life in the Atlantic Ocean. Join us for a fascinating dive into a world where art meets underwater acoustics — the study of sound to learn about life in the ocean.

Lindsay Olson, Passive Acoustics

Co-hosted by the Museum of Art & Center for Acoustics Research and Education
